

DVM EXTERNSHIP PROGRAM

OVERVIEW

WHO WE ARE

At Emergency Veterinary Care Centers (EVCC), we believe the best way to learn emergency medicine is by being fully immersed in it. Our DVM Externship Program gives veterinary students the opportunity to train inside a fast-paced emergency hospital while working directly alongside experienced ER veterinarians and managing real emergency cases.

Throughout the externship, students take an active role in patient care, clinical discussions, and treatment planning while developing the practical, diagnostic, and communication skills essential to emergency medicine.

Guided by individualized learning goals created alongside a mentor, our DVM externs build confidence in medical decision-making and gain meaningful exposure to the realities of emergency practice within a collaborative and supportive team environment.

WHAT WE OFFER

-  *Hands-on experience with real emergency cases*
-  *Personalized learning goals set by you and your mentor*
-  *Collaboration with seasoned ER veterinarians*
-  *Opportunities to refine clinical, diagnostic, and client communication skills*
